| SKILLS

Backend: Python, Django, Django REST Framework, [Node.js](#), FastAPI, Ruby on Rails, TradingView PineScript.

Frontend: Javascript, ReactJS, Material UI, Next.js, Angular, JQuery.

Web styles: HTML5, CSS, Sass, Bootstrap.

AI: GenAI implementations, MCP, Prompt Engineering, Claude, Gemini, Cursor, Vibe Coding

Machine Learning: Pandas, Numpy, Turicreate.

Databases & Caching: Postgres, MySQL, Redis, MongoDB, SQLite.

Cloud & Serverless: Google Cloud (GCP), AWS (Lambda, EC2, S3), Serverless Framework, Heroku, DigitalOcean.

DevOps, CI/CD & Tools: Git, GitHub Actions, Docker, Automated Testing.

Architecture: RESTful APIs, WebSockets, Celery, Django Channels, RabbitMQ.

Operating systems: Linux, Windows.

| WORKING EXPERIENCES

Thrive (formerly Shopventory) [US company] (June 2021 - May 2026)

I Senior Software Engineer

<https://thrivemetrics.com/> (SaaS Inventory Management system)

Technology Stack: Python, Django + Django REST, Javascript, ReactJS, AngularJS, Celery, Postgres, Redis, Sentry, Google Cloud.

- **Supporting 100,000+ daily active users** by architecting and maintaining core features within a high-traffic Python/Django + TypeScript/React system.
- **Architected and built complex modules from scratch:** wholesale systems, bulk data tools, and 4 deep integrations (Clover, QuickBooks, Shopify, Square) syncing more than 10 million transactions/day.
- **Modernized and improved** core business modules, including the billing system, purchase orders, invoices, inventory management, and reports.
- **Led integration of Generative AI** into our engineering workflow, including an AI-powered document processing feature that scraped and parsed invoice files and also launched an automated AI code reviewer that cut PR review time by 40% and boosted team velocity.
- **Raised reliability** by introducing new automated tests and **improving** CI pipelines.
- **Drove technical excellence** through architectural decision-making, code reviews, and mentoring junior and mid-level engineers to maintain high standards.
- **Collaborated** closely with customer-facing and operations teams to **diagnose complex production bugs**, investigate API edge cases, and build internal tools that accelerated issue resolution.

Coderhouse [Remote] (Jun 2022 - Nov 2023)

I Python course teacher

<https://www.coderhouse.com/> (Online Academy)

Course topics: Python, Django, and AI tools introduction.

- **Designed and delivered six 3-month intensive bootcamps on Python**, Django, and applied AI/LLMs — 280+ hours of live instruction to 600 students across all cohorts.
- **Mentored 600 students** through their final projects, helping them bridge the gap between theory and real-world applications.
- **Managed a team of 10 teaching assistants**, coordinating grading and code-review workflows for 300+ submissions per cohort to keep feedback fast and consistent.
- **Earned a 4.9/5 rating across 600 reviews** (top 5% of instructors), recognized for making complex backend and AI topics accessible to diverse audiences.

Cirbox (Move to the Bit) [Spain, remote] (Mar 2020 - June 2021)

I Senior Backend Engineer & Solutions Architect

<https://www.cirbox.es/> (Was a B2B SaaS credit assessment service)

Technology Stack: Python, Django, Django REST, Serverless Framework, AWS, AWS Lambda, Postgres.

- **Architected and developed** a comprehensive Python, Django REST Framework API from the ground up, exposing 30 endpoints.
- **Led the serverless deployment** (AWS Lambda, Serverless Framework), cutting infra costs by 50%, optimizing for scalability and performance.
- **Owned the full development lifecycle**, balancing the delivery of complex new features with the proactive maintenance of existing features.

FAB Armadillo S.L. [Spain, remote] (Feb 2018 - Mar 2020)

I Senior Fullstack Developer

FAB Armadillo S.L. is a private crypto currencies hedge fund

Technology Stack: Python, Django, Django Channels, Celery, Javascript, jQuery, Tradingview Pinescript, Postgres and Bootstrap.

- **Built a 24/7 real-time alert system** (Django Channels, Redis, Celery) monitoring 20 trading pairs and processing 1000 trading signal events/sec at 99% uptime.
- **Architected a backtesting simulator from scratch** to test and validate trading strategies across 10 years of historical market data.
- **Designed a custom visualization system** to help the fund analyze and simulate the performance of complex trading strategies.
- **Automated data collection** by building robust web scrapers and data analysis pipelines to inform high-stakes trading operations.

Turpial Development (Jan 2017 - Nov 2017)

I Web application Developer

Technology Stack: Python, Django, Angular, Javascript, Celery, WooCommerce, Postgres, Bootstrap, CSS.

■ **Client:** IUCN Red List of Ecosystems (<https://iucnrle.org/>)

Improved a global reporting module used by 10,000 researchers across 5,000+ ecosystem assessments in 100 countries that enables environmental researchers to submit data on endangered ecosystems for peer review and editorial evaluation.

■ **Client:** Airways Magazine (<https://airwaysmag.com/>)

Optimized administrative workflows and integrated complex third-party APIs—including Stripe and WooCommerce processing over 10,000 orders/month.

■ **Client:** Steam Energy

Developed a custom industrial audit system from the ground up using Django and Angular, automating the tracking and maintenance of steam equipment in plants.

Reto Mantra (Jun 2015 - Apr 2016)

I Vice President

Reto Mantra is a network of Young entrepreneurs driven by the Venezuelan Franchise Chamber.

- **Served as 1 of 5 executive committee members**, overseeing the strategic direction for a network that trained over 1,500 entrepreneurs.
- **Led strategic planning and project management**, ensuring the organization's initiatives aligned with long-term goals.
- **Built and managed key alliances** with external institutions to expand the organization's reach and impact.
- **Acted as the official spokesperson**, representing the organization in media appearances and before partner institutions.

Loyola Summer Camp (Jul 2010 - Aug 2015)

I Summer camp Coordinator (Summer job: July to August)

- **Led a team of 15 guides** and managed the daily logistics and operations for a camp of 150 children.
- **Owned the recruitment and training process** for the staff, handling the selection and onboarding of the team each summer.
- **Designed and implemented structured programs** and activities for various age groups, balancing complex scheduling with safety and engagement.
- **Accountable for the well-being and safety** of all participants, ensuring a high-quality experience for both campers and staff.

| EDUCATION

Universidad Simón Bolívar 2015 (Top 5 national Universities)

Mechanical Engineer Degree.

IESA (2015 - 2016)

Organizational leadership diplomat

| CERTIFICATIONS

React - Codecademy (2023)

Academia Hack (2016)

Web Development BootCamp - 4 intensive months.

| LANGUAGES

Spanish (Native)

English (C2 level)

Portuguese (Basic conversation)
